

PHOTOBLOCKS

What are Photoblocks? It's a wooden block with a printed photo on it. (Photo is not printed directly on the wood) The edges are rounded and have the organic feel. Each print on wood is covered with a protection layer which makes it water and light-resistant. The protection layer gives photo blocks an unique hand painted look. They come ready to hang flat on the wall but they can also stand on their own on your furniture. This product is 100% handmade with a lot of care and love.
